

[Elcad 7.6 Crack | Updated](#)

## 1.2.8 Keeping the Filter Settings in the Symbol Selection Dialog

In ELCAD/AUCOPLAN, you can open the symbol selection simply using the command "\*" or the corresponding button. In the symbol selection you can then apply a filter by entering characters and/or specifying the symbol types.

With version 7.6.0 you can now ensure that the set filter is the default setting the next time you call the program. Simply activate the checkbox "Save filter".
